Dear sir,

I am Yash Darji , a final year Computer Science and Engineering branch student. I am pursuing my B.Tech from Nirma University, Ahmedabad. I am completely obsessed with the field of Machine learning and Artificial intelligence , I cannot wait to put my skills at work in developing new and amazing things. I have great problem solving skills and am proficient in Data Structures , Algorithms and Object Oriented Programming. I do competitive coding as a hobby. In this era of technology, I love to explore various technologies and new trends coming in the market.

My passion for programming, developing websites and expertise in implementing machine learning models would make me an excellent addition to your team. As the Web Developer intern at Web999, I have excelled at designing, blogging and developing websites. I was an active Participant in the LetsGrowMore Virtual Internship Program in Data Science. During that Internship ,I worked on various data science projects. At present I am enhancing my knowledge in Deep Learning and Data mining. During my academics I am studying artificial neural networks, image classification, feedforward neural networks, K nearest neighbor (KNN) ,linear regression, logistic regression ,reinforcement learning, decision trees and random forests, Bayesian learning and clustering with k-means. The main libraries I have used are Keras (Tensorflow) and Sci-kit learn.

I believe that I would be an asset to your team. This job would provide me with the ideal opportunity to expand my skills as a fresher . Thank you for your time and consideration. I am eager to discuss my qualifications further. I look forward to hearing from you.

Respectfully yours,

Yash Darji
